

pretty pillow
with Cupron copper technology

softens the appearance of fine lines & wrinkles

- ▶ reduces the appearance of wrinkles and fine lines
- ▶ promotes healthy-looking skin and radiant skin tone
- ▶ resists bacteria and microbes that cause odor

Includes washable copper fiber pillowcase

Distinctive design reduces "pillow face"

Gentle slopes within the memory foam pillow core help to keep facial skin taut throughout the night, while Cupron copper technology reduces the appearance of wrinkles while you sleep.

Cupron Copper Fabric Pillowcase promotes Healthier Skin

Our Cupron copper fabric pillowcase will help to improve skin texture and tone while reducing the appearance of fine lines and wrinkles. The cosmetic and antimicrobial benefits of the Cupron pillowcase are not affected by repeated washing. For maximum performance, do not use fabric softeners in the washer or dryer.

Antibacterial and Antifungal

Independent testing proves our Cupron fabric cover is resistant to bacteria and fungus, protecting your pillow from attacks by microbes and deodorizing while you sleep, providing you a more hygienic sleep environment.

Pressure Relieving Memory Foam

Originally developed for the space program, high density, temperature sensitive memory foam provides exceptional, contouring support while reducing uncomfortable high-pressure areas.
